HARBOUR MASTERS NOTICE No. 01/2007

## LOCAL NOTICE TO MARINERS

To ALL craft entering and leaving and in the vicinity of Teignmouth:

Please be advised that:-

Between April and August 2007 bathometric surveys will be carried out as part of the South West Regional Coast Monitoring programme and therefore vessels may be working close to the shore at times of high water. Such vessels have restricted manoeuvrability but will be displaying the relevant shapes. You are requested to navigate with caution when in the vicinity of survey vessels and give them as wider berth as possible and to adhere to the IRPCS International Regulation for preventing collisions at Sea 1972.

During Saturday 26<sup>th</sup> and Sunday 27<sup>th</sup> August there will be a Power Craft Grand Prix organised by the RYA taking place off Teignmouth Sea Front between the hours of 1230 and 1600. Racing will be marshalled with safety craft and buoyage in place but mariners are requested to keep clear of the race area and to navigate with caution when in its vicinity. For detailed information about the events and course can be obtained from the Harbour Office.

Tuesday 1<sup>st</sup> May

BT cable will be installing cable adjacent to the western side of Shaldon bridge at low tide. The main channel will be closed to marine traffic for approximately 1 hour. Please avoid the area as far as possible.
